I love working on the UI. It is ever changing and always evolving becoming more and more powerful every day.

EXPERIENCE

OCTOBER 2017 – PRESENT

SOFTWARE ENGINEER, CERNER

- Developed an application designed for charge nurses to have the ability to add, view, and edit assignments of personnel to patients predominantly using Ruby on Rails and JavaScript (ES6).
- Uplifted Charge Nurse application to use React-Redux architecture to further increase speed and state management.
- Designed 'React Road Map' for the team to follow which lays out the required work to be completed with a full break down on each individual task. This also included who would complete the task, time estimates, and any incurred risks.
- Developed the "Engineer Portal" during a hackathon using React which is an application that keeps track of developers and their code review statistics. This ensures that all developers are taking their part in the development process. Started as a project for our team, but now is in the process of being adopted across the whole organization.
- Currently working on a dashboard that uses React for its UI. This dashboard gathers various metrics wanting to be tracked by a hospital. It aggregates all of the metrics into a presentable UI that will be displayed to C level associates.

MARCH 2017 – OCTOBER 2017

APPLICATION DEVELOPER, DSI

- Developed Wire application to communicate with mobile devices through RESTful web service calls.
- Developed an application to support Bin Transfer via the use of License Plate Numbers.
- Developed an application that would Inquiry the database based on the user selection on Item, Bin, or License Plate Number.
- Developed multiple test applications that would combine each of the developer's sub-applications into one application for continuity testing

MAY 2016 – MARCH 2017

SOFTWARE INTERN, WAGNER LOGISTICS

- Write queries in SQL Server Management Studio to gather data for further analysis on Industry Metrics
- Converted 8 tables from our Oracle Database to our SQL Server Database (Data Warehouse).
- Designed 12+ reports using Jaspersoft Business Intelligence Software.

- Working on EDI Integration
- Developed 8 Dashboards for top clients, with 30+ queries across the Dashboards in BIME Reports

EDUCATION

MAY 2017

B.S. COMPUTER INFORMATION SYSTEMS, UCM

GPA: 3.88

Emphasis on Software Development.

Dean's List: 2015, 2016, 2017

MAY 2015

ASSOCIATE'S OF ART, LONGVIEW

GPA: 3.68

SKILLS

- Redux
- React
- JavaScript

ACTIVITIES

Outside of keeping up to date with React/Redux I really enjoy gaming. I enjoy working out. I was pretty big into CrossFit for a while. Pretty much anything outside I enjoy partaking in.
